

WM EVENTS × PIVOT EXPERIENTIAL

PIVOT XP · EXPERIENTIAL TECHNOLOGY

THE EXPERIENCE CATALOG

PREPARED FOR WM EVENTS · AUGUST 2026

Capture systems, gamification, AI enhancements, and physical takeaways. Every unit in this catalog is built, wrapped, and crewed by Pivot — so the technology inside your rooms holds the same standard as the rest of the design.

The Life of the Party

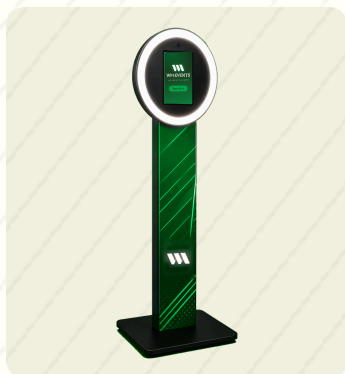

PIVOTXP.COM · TOMMY@PIVOTXP.COM

01 The Booth Line

Six capture systems, one standard: broadcast-quality output, full custom wraps in your client's brand, and uptime your producers can bet on. Every unit ties into the registration platform you're already running, and every unit supports AI background removal.

● SHOWN WRAPPED IN WM EVENTS LIVERY — EACH UNIT IS RE-SKINNED PER EVENT

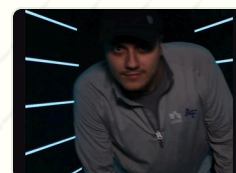

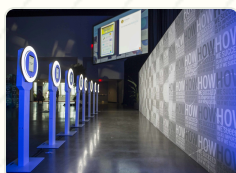

PB • 01

Selfie Station

The ring-light icon, rebuilt as brandable real estate. A freestanding kiosk with a halo light and a full-wrap column — it keeps a line moving all night in a two-foot footprint, which is usually the only floor you have left.

STILLS • GIF • BOOMERANG • VIDEO / SMS • EMAIL • QR / 2 FT FOOTPRINT

PB • 02

Pro

DSLR-grade capture with an adjustable head and a dual-sided display — the photographer-quality booth without the photographer, and without the light stands in your sightlines.

DSLR CAPTURE • STILLS • GIF • BOOMERANG • VIDEO • **PHYSICAL TAKEAWAYS**

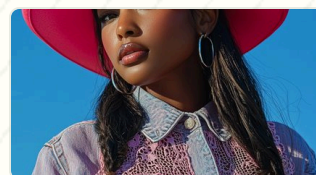

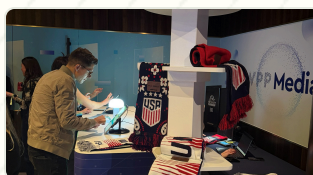

PB • 03

Elevated Kiosk

The statement piece. Full-body kiosk with programmable LED edge lighting, a large portrait touch display, and DSLR-grade capture — optional on-board printing puts a takeaway in hand within seconds of the shutter.

DSLR CAPTURE • **PROGRAMMABLE LED EDGE** • OPTIONAL PRINTING • PHYSICAL TAKEAWAYS

01 The Booth Line

Motion systems

Continued — the units that move. Robotic, orbital, and bullet-time capture, for the moment in the run-of-show where the room needs to stop and watch something happen.

PB • 04

Robot

A rail-mounted robotic arm running programmable, cinematic slow-motion moves. It is a crowd magnet on its own, and it shoots like a camera operator who never gets tired.

PROGRAMMABLE MOVES • CINEMATIC SLOW-MO • RAIL-MOUNTED ARM

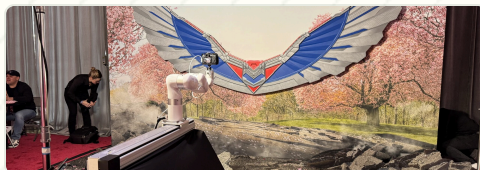

PB • 05

360 Camera

Slow-motion orbit video with branded overlays, delivered to the guest before they walk away. Mount it on truss for a cinematic overhead, or floor-mount it when the footprint is tight.

TRUSS OR FLOOR MOUNT • INSTANT DELIVERY • BRANDED OVERLAYS

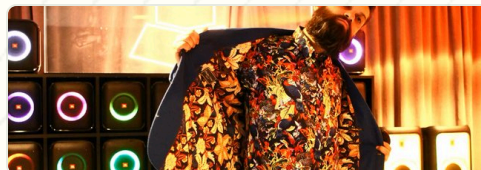

PB • 06

Array

Bullet-time from a seven- or fourteen-camera gantry. Every lens fires in sync to freeze the moment, then sweeps around it — branded end to end, from the gantry wrap to the final frame.

7 OR 14 CAMERAS, SYNCED • FREEZE + SWEEP • BRANDED END TO END

02 AI Enhancements

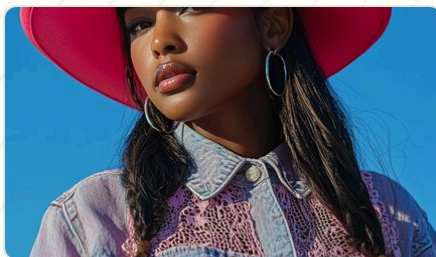

A software layer that runs on every booth in the line. Rendered in seconds, on site, on our hardware — no cloud queue, no "we'll email it tomorrow."

ENH • 01

AI Image Regeneration

A guest's photo becomes the input to a full prompt — regenerated inside a scene you art-direct.

ENH • 02

Themed Regeneration

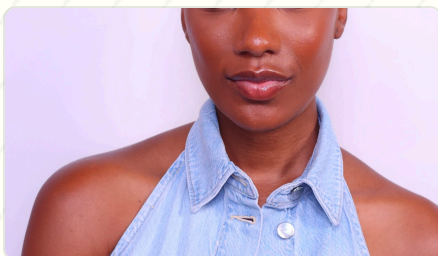

The same engine, art-directed to a theme — so the output matches the room, not a generic filter.

ENH • 03

Generative Keepsakes

A date and a place become one-of-a-kind artwork, printed onto something they carry home.

ENH • 04

AI Background Removal

Subjects stay exactly as shot, placed naturally into the scene. Works on every unit in the line.

ENH • 05

Personalized Signage

Guests type their name and it renders into the scene — a marquee, a menu board, a step-and-repeat.

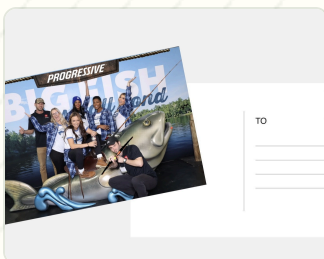

ENH • 06

Cinematic Hero Video

A photo plus a prompt becomes a short film of their entrance — an ad spot starring the guest.

03 Physical Takeaways

These leave the event on refrigerators, desks, and binders — and keep the brand living there long after load-out.

TA • 01

Postcards

Front: the guest. Back: an art-directed mailer, stamp box and all.

TA • 02

Mosaic Prints

Each portrait prints as a sticker and goes on the wall — the room builds one picture.

TA • 03

Custom Merch

Their own generated artwork, printed onto something they actually carry out.

TA • 04

On-Site Print Bar

A staffed print station in the room — magnets, prints, and posters pressed while they wait.

Gamification & Custom Software

Give guests something to win and they will queue for it. Custom builds with real-time scoring — skill games, trivia, auction boards — written for the event.

GAME • 01

Custom Interactives

A guided experience written for one event — guests answer, it generates, they take it home.

GAME • 02

Live Leaderboards

Live standings on any screen in the room, updated the moment a score lands.

GAME • 03

Karaoke & Party Games

Guests perform, we shoot it, and the share-ready cut is waiting for them at the door.

Platform & Connectivity

One identity system underneath every touchpoint — so the data you promised the client actually shows up, and the activation never waits on venue internet.

PLAT • 01

One Credential, Whole Footprint

At a private clubhouse steps from Augusta National we issued fabric wristbands paired with bamboo RFID cards. Five days, a thousand-plus entries, not one check-in line.

01

CREDENTIALLED

Assigned against your guest list in seconds.

02

ONE SCAN

Entry and every touchpoint after it.

03

HOST ALERTED

A VIP scans in; their host gets a text.

04

DATA FLOWS BACK

Into your system — no new compliance surface.

PLAT • 02

Event Internet

Rented by the event, deployed by our crew. Starlink units put full-bandwidth internet anywhere outdoors — a parking lot, a ski slope, a fairground, a tented field in north Georgia. For footprints that need extra coverage we run redundant Wi-Fi with live failover, so the activation never waits on house internet.

STARLINK RENTAL FLEET

REDUNDANT WI-FI MESH

LIVE FAILOVER BACKUPS

FULL OUTDOOR COVERAGE

STANDARD ON EVERY UNIT

What ships with all of it, without being asked.

Custom wrap

Built to your client's brand book, printed in-house before load-in.

On-site crew

Our technicians run the unit all event. You never staff it.

Same-night delivery

Guests get their content before they leave the room.

Reporting export

Scans, sessions, shares and opt-ins, in your client's format.

In the Field

Beyond the booth line: full custom sets, broadcast desks, and branded builds — designed, fabricated, and run by Pivot crews. If it needs to be built and it needs to work on show day, it belongs on this page.

PRIVATE CLUBHOUSES · BLACK-TIE GALAS · CORPORATE MILESTONES · RED CARPETS

ONE VENDOR, ONE STANDARD

We build it, we wrap it, we run it.

Design, fabrication, install, on-site crew, and strike — handled by the same team that built the software inside. There is no second phone number to call at 6pm on show day.

DESIGN

FABRICATION

INSTALL

ON-SITE CREW

STRIKE

Proof of Work

The online edition of this catalog runs three real client builds you can drive in the browser — no install, any device. These are shipped projects, not mockups.

01

Polaris "Tough Doesn't Quit" Kiosk

A 6.1 GB Unity kiosk rebuilt as a 130 MB webpage — magnetic carousels, tap-to-play, an idle attract loop, and every interaction captured for reporting.

pivotxp.github.io/wm-events-catalog/polaris.html

02

Music Trivia Leaderboard

A real arcade leaderboard screen, fed by simulated score submissions so you can watch standings shuffle live — the same build that ran on the floor.

pivotxp.github.io/wm-events-catalog/#proof

03

Phone-to-Jumbotron Wall

Build a dedication sign on your phone and watch it hit the stadium board seconds later — the full phone-to-jumbotron pipeline, running live on the page.

pivotxp.github.io/wm-events-catalog/#proof

TAKE THE ASSETS WITH YOU

Every photo, video, and render in this catalog.

Full resolution, organised by product line, in five downloadable packs. No sign-in, no request form — built so your designers can drop them straight into a client deck.

pivotxp.github.io/wm-events-catalog/kit.html

WHERE IT FITS

Mapped to the rooms you are already designing.

Galas & nonprofit

Elevated Kiosk or Pro on the cocktail floor, prints as the auction-night keepsake.

Corporate & conference

Selfie Station at registration, badge scan to capture, data straight to the client.

Weddings & social

360 or Array for the reception, delivered to the guest's phone before the next song.

Gameday & hospitality

Robot and gamification in the activation footprint, leaderboards on the house screens.

PIVOT XP · EXPERIENTIAL TECHNOLOGY

Built for events that cannot fail.

Booths, games, AI, takeaways, connectivity, and the software underneath all of it — one vendor, one standard, wrapped in your client's brand. You design the room. We make sure the technology in it never becomes the story.
